Relevant Experience

Web developer. **FreeLance** – Present

Front End developer . **FeenTech** Jan – Jul 2022

- Developed and styled interactive web applications
- Tested and fixed code and implementation issues, to improve hospitality during the experience and better serve the client needs.
- Architected and implemented the user interface for the contact component using Bootstraps and css.
- Contributed extensively to the creation of the main architecture using design patterns to the class diagram to make it flexible in future chngement.

Mobile Shopee E-Commerce Website . **UpWork** Jan 2023 – present

- I established secure MySQL connections and defined database tables for 'M-shope' using PHP and SQL.
- Implemented AJAX for dynamic cart updates and utilized Owl Carousel for product displays.
- Developed PHP scripts for product listings and user-friendly cart interactions.
- Crafted detailed product pages with dynamic data retrieval for comprehensive product information.

Selected Projects

Full-Stack Blog App . Next.js & React, JavaScript, Prisma, SWR, MongoDB, Firebase

- I developed a backend authentication system using NextAuth, enabling secure user authentication and authorization for various endpoints.
- I created RESTful API endpoints using Next.js, Prisma, and MongoDB, allowing functionalities like retrieving categories, posts, comments, and user sessions.
- I built a responsive UI with authentication states, enabling users to access specific features like writing and logging out based on their authentication status .
- I developed a comment section where users can post and view comments in real-time using SWR , enhancing user engagement.
- I designed a writing platform where users can compose rich-text posts, upload media.

Portfolio . Next.js & React , TypeScript, Tailwind CSS, Framer Motion, Vercel hosting

- Engineered server-side email functionalities, implementing strict data validation. Optimized user interface flexibility with React's API for section and theme management.
- Empowered users with a customizable React theme switcher, offering light/dark mode options.
- Designed a structured React Email template for new message notifications from contact forms.

Movie App review . React Js, Java, Spring Boot, MongoDB

- Crafted a React movie platform with UI integrations and React Router for navigation, allowing rich-text posts, media uploads, and video playback..
- Engineered RESTful APIs with Next.js, Prisma, and MongoDB for movie functionalities.
- Implemented Spring Boot systems managing movie data via controllers and services.

Skills

Programming Languages

JavaScript, TypeScript, HTML, Express, NodeJS, CSS, Sass, PHP

Libraries & Frameworks

React, Next.js, Gatsby, React Native, Tailwind, bootstrap

Tools & Platforms

Git, GitHub, Netlify, Vercel, Heroku, WordPress, Docker, Firebase, Figma

Certification

freecodecamp

Responsive Web Design

JavaScript Algorithms and Data Structures

Education

Al Akhawayn university

Master Software Engineer – 2023

American University of Leadership

Bachelor in computer engineering minor in big data – 2021

Languages

English: Fluent

French: Bilingual

Arabic: Mother tongue

Mandarin: Limited proficiency

Interests

Bodybuilding, chess, video editing, Cinematography, content creation and football
